

Partnerships & Collaborations

The University of California Cooperative Extension is dedicated to the principle of service, and believes that an informed and educated citizenry is necessary for the continued development of our society. Our goal is to ensure high quality, creative, and integrated research for the residents of Placer and Nevada Counties. To accomplish this, a continuum of approaches is needed that builds on the collaboration and communication among many segments of the two counties.

Priority issues have been addressed this past year through our continued relationship and partnering with many organizations, agencies, and individuals. Following is a list of just some of the groups with whom we collaborated to accomplish many of our jointly held goals.
